

CAPT. KENNETH E. HENRY
MARINE SURVEYOR * MARINE CONSULTANT
38 OAK HILL LANE * ELKTON, MD 21921
410-287-2028

YACHT SURVEYOR * MARINE CONSULTANT * USCG LICENSED CAPTAIN
SHIPWRIGHT * MARINE SPECIALIST

Member of the American Boat and Yacht Council, Society of Accredited Marine Surveyors (1995), International Institute of Marine Surveying (2011), and American Institute of Nondestructive Testing (2013).

Marine surveyor and consultant for financial institutions, insurance companies, and private individuals for over 30 years.

PAST EXPERIENCE

1974 – Constructed first fiberglass boat

1974 – Certified welder and machinist

1979 – Obtain USCG license for operating commercial vessels

1980 – Established Capt. Phineas McHenry, Ltd. (President and Owner of company)

- Sailing School
- Boat Rentals
- Boat Maintenance
- Boat Repair
- Marine Survey and Consultant
- Boat Deliveries
- Yacht Charters
- Captained work vessel for Maryland Toll facilities

1984 – Established Phinn Yachts, boat building company

- Recognized by USCG as boat building company and inspected yearly
- Built 50' staysail schooner commercial vessel rated for 24 passengers
- Built plywood, steel, and fiberglass boats
- Installation of all systems and components

1990's – Perform specialty work for marinas

- Install engines
- Install electrical systems
- Install electronics
- Modified boats
- Build push boats
- Barge repairs

- Senior Engineer and Captain on patrol boats for Aberdeen Proving Grounds
- Assistant Engineer and deckhand on 240 ton tugboat

2011 – Barge inspection for environmental agency representing the state of Maryland to determine if barge meets the specifications and requirements for specified use

2013 – Inspect vessels for U.S. Corps of Army Engineers

Also, I inspect many commercial vessels (dinner boats, barges used for restaurants and pools, charter vessels, work boats.) I have performed simplified stability test. I buy boats and restore for resale. I am recognized in the industry as one who has the expertise to inspect wooden and metal boats.

ADDITIONAL COMMENTS

I have been in the marine industry since 1974. I have received experience in all boat building materials (wood, fiberglass, steel, aluminum, etc.) and construction. My boat building experience and surveying requirements have given me the knowledge of method and regulations to the installation of all components of a boat (engines, fuel system, electrical system, plumbing, etc.) I have first hand knowledge of building a vessel from start to finish. Member of ABYC and SAMS, I deal with standards and regulations daily and all revisions.
